

About BullsEye:

Founded in 1999 | 99% customer retention rate | Single source for multiple solutions | One invoice

BUSINESS CONCERN:	SOLUTION:
How are you routing branch traffic today? Are you considering local breakouts or SD-WAN? Office 365?	Zscaler Cloud Security Platform brings the entire security stack closer to the user to ensure identical protection no matter where they connect, with fast and seamless access to the internet and cloud applications.
What are your main goals for implementing SD-WAN? Is zero-touch provisioning important?	Secure SD-WAN without the need to buy, deploy or manage security appliances at each location. You get the entire security stack as a cloud service, providing identical protection for each user.
Do you have a solid, secure, work-from-home security plan for remote employees?	With an increase of malicious attacks targeting remote workers, a rapid deployment of a full cloud based security stack provides for identity based access management and visibility across all users.

Solution Highlights

- 1. Unmatched Security Awareness**
"Always on protection" means no appliance complexity or management.
- 2. Ease of Scalability**
Scale seamlessly from 10 - 100,000 users.
- 3. Project Management**
A dedicated project manager schedules skilled technicians to install the solution.
- 4. Simple Security Management**
Our **Expert Network Center** ensures a successful deployment whether it's in tandem with BullsEye's SD-WAN, your current SD-WAN provider, or as a standalone service.

Additional Benefits

- Can be billed monthly (OPEX vs CAPEX)
- Store and analyze device data with cloud security
- Enforce security policies for all remote and on-site users
- Rich analytics
- Easy to use web portal
- Cloud security active monitoring
- Scalable, secure, and proven cloud infrastructure
- Simple & cost effective implementations
