

About BullsEye:

Founded in 1999 | 99% customer retention rate | Single source for multiple solutions | One invoice

BUSINESS CONCERN:	SOLUTION:
<p>Are you looking to upgrade the cost and reliability of your phone service but want to keep your existing system?</p>	<p>Trunking allows you to connect your existing equipment through BullsEye’s reliable IP Network – maximizing your phone capabilities and cost savings.</p>
<p>Do you have a plan to scale your business communications with the expansion of locations?</p>	<p>With nationwide availability and high scalability, a Trunking solution allows you to plan for scaling your communications easily as your business grows.</p>
<p>Are you looking to use existing broadband connections for a VoIP/data transition?</p>	<p>Voice and data traffic can easily be delivered over a single dynamic broadband pipe. By using proprietary BGP (Border Gateway Protocol) gateways, we can also ensure maximum performance across the enterprise for both voice</p>

Solution Highlights

- 1. Equipment Verification -**
We take the guesswork out of verifying that your existing equipment is compatible with our BroadSoft platform.
- 2. Keep the Numbers You Want -**
We work with you to inventory the numbers you plan to port, or we order new numbers for you.
- 3. Choose One or Many -**
We offer single or multi-location options and offer a controlled migration to Trunking for a smooth transition to a better voice solution

Additional Benefits

- Can be purchased one at a time, compared to other solutions that must be purchased in increments of 23 or 24 channels.
- Disaster recovery to keep your data safe.
- Reduced costs through convergence of voice and data
- Seamless integration with existing IP PBX system
- Eliminate waste when you pool and burst call paths across multiple locations
