

About BullsEye:

Founded in 1999 | 99% customer retention rate | Single source for multiple solutions | One invoice

BUSINESS CONCERN:	SOLUTION:
Do you need a backup connectivity solution for critical business systems?	A wireless LTE failover solution is the perfect backup plan for when your regular connections go down. Minimize disruption and downtime significantly by adding this solution to your business' internet plan.
You already have a wireless backup plan in place, but are you getting the best rates for data?	BullsEye is able to offer unlimited, uncapped & unthrottled data plans at a budget friendly price to keep your business running.
We have a hybrid SD-WAN system deployed and need a connection option for teams in outpost areas.	A wireless, LTE solution pairs perfectly with your SD-WAN as an 'always connected' capability for those in remote locations.

Solution Highlights

- 1. Technical Analysis**
Our technical consultants identify and understand what network requirements are needed.
- 2. Proposed Solution**
We present solutions and network diagrams to show exactly how the solution will work.
- 3. Project Management**
A dedicated project manager schedules skilled technicians to install the solution.
- 3. Device Optimization**
We partner with best-in-breed technology providers to give you the best appliance options to suite your wireless connection needs.

Additional Benefits

- Cross carrier pooling provides the best service available regardless of location
- Managed via the cloud for easy integration with your existing systems
- Seasonal or rapid deployment of Internet connectivity when using wireless as your primary data source
- Easily deploy remote retail or office settings
- Can be integrated with your SD-WAN deployment
